Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method of program transfer. Some of the independent claims identify the feature of "recognizing a plurality of pre-recorded programs selected for transfer by a user, for each of said plurality of pre-recorded programs selected for transfer, prompting said user to program the associated transfer period". Furthermore, some the independent claims identify the feature of "recognizing a plurality of pre-recorded programs selected for transfer by a user, recognizing an associated transfer period programmed by the user, wherein the associated transfer period comprises for each of said plurality of pre-recorded programs selected for transfer: an associated date selection; an associated record start time; and an associated record stop time". Moreover, some of the independent claims "recognizing a plurality of pre-recorded programs selected for transfer by a user, recognizing an associated transfer period programmed by the user, and recognizing a conflict in transfer periods between conflicting records; and prompting said user to resolve said conflict". The closest prior art, Yao et al discloses a program transferring apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
